1. Statistics New Zealand produces two different series for quarterly GDP in volume: an expenditure-based measure and a production-based measure. Each series results from independent data and estimation techniques and provides an alternative measure of New Zealand's economic activity. Statistics New Zealand promotes the production-based measure as the preferred measure of economic activity in the short-term. At current prices, however, only the expenditure-based measure is available.

ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT

The OECD is a unique forum where governments work together to address the economic, social and environmental challenges of globalisation. The OECD is also at the forefront of efforts to understand and to help governments respond to new developments and concerns, such as corporate governance, the information economy and the challenges of an ageing population. The Organisation provides a setting where governments can compare policy experiences, seek answers to common problems, identify good practice and work to co-ordinate domestic and international policies.

The OECD member countries are: Australia, Austria, Belgium, Canada, Chile, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Israel, Italy, Japan, Korea, Latvia, Lithuania, Luxembourg, Mexico, the Netherlands, New Zealand, Norway, Poland, Portugal, the Slovak Republic, Slovenia, Spain, Sweden, Switzerland, Turkey, the United Kingdom and the United States. The European Union takes part in the work of the OECD.

OECD Publishing disseminates widely the results of the Organisation's statistics gathering and research on economic, social and environmental issues, as well as the conventions, guidelines and standards agreed by its members.

Quarterly National Accounts

The OECD's *Quarterly National Accounts* contains a selection of the accounts most widely used by economic analysts: GDP by expenditure, GDP by industry, GDP by income, gross fixed capital formation by asset, gross fixed capital formation by institutional sector, Saving and Net lending and components of disposable income as well as population and employment data (national concept) and employment by industry (domestic concept).

The data cover 36 OECD countries, and totals are provided for the following groups: OECD, OECD-Europe, European Union, Euro area, G7 and G20.

Data are based on the System of National Accounts 2008 (2008 SNA) for all OECD members.
